\$ADA**

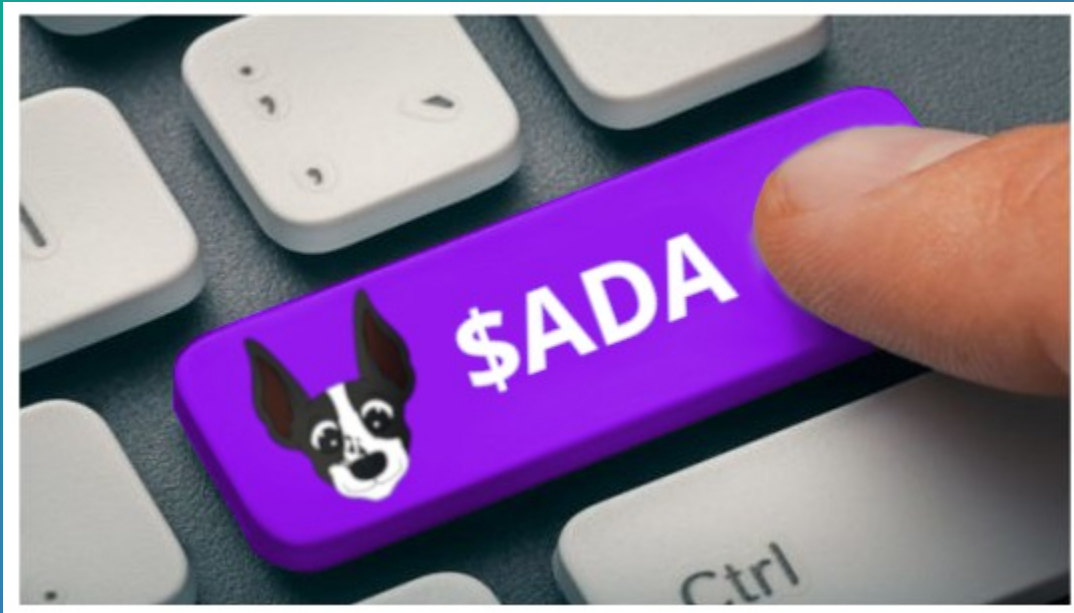

Anatoly Yakovenko's beloved dog!

Many may ask, 'What is Ada?'

Ada is the name of the dog owned by Anatoly Yakovenko, one of the co-founders of Solana. This project pays homage to him, his dog, and responds to the popular demand for dog-based narratives in the crypto space.

Ada was created in response to this demand and provides value to the ecosystem created by Anatoly and his partner—the Solana blockchain.

Ada represents more than just a memecoin. As many of you in the crypto space may already know, memecoins tend to outperform many other assets in the crypto market. Simultaneously, they are often criticized for being perceived as valueless assets. However, this statement is far from the truth, as memecoins serve as a bridge for everyday consumers into the cryptocurrency market in a fun and engaging way, thereby increasing overall demand for various types of cryptocurrencies across different sectors.

Ada's vision extends beyond being a memecoin; it aims to serve as a gateway to attract more consumers, institutions, and native chain enthusiasts into the Solana ecosystem, thereby boosting on-chain activity and growth. This manifests in various aspects, including but not limited to:

- Enhancing the overall community view of memecoins and fostering on-chain community growth.
- Increasing TVL (Total Value Locked) on Solana.
- Increasing UAW (Unique Active Wallets) through onboarding new Solana chain users.
- Increasing the usage of charting tools and decentralized exchanges (DEX) such as Birdeye, Raydium, and Jupiter.
- Increasing the number of downloads for Solana-based non-custodial wallets, such as Phantom Wallet.
- Positively influencing the movement of the \$SOL token's price.

In the end, attracting more people means raising awareness and educating about the ecosystem. With education being the key to achieving mass adoption in the crypto space, Ada provides immense value to Solana by fostering a fun and safe environment for users to participate and learn.
